

YANA VERMA

yverma3@charlotte.edu | (919) 321-1760 | [linkedin.com/in/yana-verma](https://www.linkedin.com/in/yana-verma)

EDUCATION

University of North Carolina at Charlotte, College of Computing and Informatics – Charlotte, NC *Bachelor of Science, Data Science | Minor in Artificial Intelligence*

PROFESSIONAL & VOLUNTEER EXPERIENCE

Fidelity Hackathon, Participant -Durham, NC

May. 2026 – May. 2026

- Developed *Bloom*, a gamified financial literacy app helping first-year college women build budgeting, investing, and money management skills through microlearning.
- Designed UI in Figma and collaborated using React, Python, and GitHub to build features like goal tracking, virtual investment portfolios, and personalized financial tools.

Duke AI Hackathon, Participant – Durham, NC

Nov. 2025 – Nov. 2025

- Created *TrialVision*, a website that helps medical professionals quickly evaluate the feasibility, ethics, and potential outcomes of clinical trial ideas
- Designed a multi-page, user-friendly interface using Figma.

Global Academy of Excellence, Intern – Remote

Aug. 2022 – Jun. 2023

- Created educational materials used by 100K+ rural students across 220+ model schools in 6 districts, supporting 21st-century skills development.
- Collaborated with academic mentors to align curriculum with modern standards and improve content distribution efficiency at scale

Searstone Retirement Community, Server -Cary, NC

Jan. 2025 – August. 2025

- Delivered daily meal service with professionalism and care to **100+ residents**, ensuring a positive dining experience.

PROJECTS

Predicting Dominant Macronutrients in Foods

Aug. 2026 – Sept. 2026

- Analyzed USDA FoodData Central nutrition data to predict whether foods were carbohydrate-, fat-, or protein-dominant, preparing 377 Foundation Foods for modeling.
- Cleaned and prepared nutritional data using median imputation, feature selection, and an 80/20 train-test split while preventing data leakage in model development.
- Built and evaluated Decision Tree and Random Forest classifiers, with the Random Forest achieving 76.32% accuracy and outperforming the baseline model by 17.11 percentage points.
- Tech Stack: Python, Pandas, Matplotlib, Scikit-learn

Student Performance Analysis

Sept. 2026 – Oct. 2026

- Analyzed 395 student records across 33 variables to examine relationships between study time, absences, previous failures, and final math grades.
- Cleaned and explored the dataset using correlation analysis and data visualizations, identifying previous class failures as the strongest predictor examined.
- Built and evaluated linear regression, logistic regression, and decision tree models, achieving 75.9% accuracy with the decision tree classifier.
- Tech Stack: Python, Pandas, Matplotlib, Scikit-learn

LEADERSHIP EXPERIENCE

Sunrise Movement, Head of Actions – Cary, NC

Aug. 2024 – May. 2025

- Organized 3+ climate campaigns, boosting membership by 20% and sparking a key policy discussion on climate resilience.
- Delivered speeches before the Board of Education, advocating for stronger climate resilience policies and youth representation.

SKILLS

Technical Skills: Python, Java, Figma, Website Design, Microsoft Office Specialist (MOS), Cloud platform (AWS), Database systems (Oracle, SQL), Adobe Photoshop, Adobe Illustrator

Certifications: Microsoft Excel, Microsoft Office Specialist (MOS): PowerPoint Associate certification, Adobe Certified Associate in Graphic Design & Illustration Using Adobe Illustrator, Adobe Certified Associate in Visual Design Using Adobe Photoshop **Professional Skills:** Frontend/App Development, Design/Product Thinking, Public speaking, Campaign planning
